Summary

I am an aspiring roboticist and a thorough science enjoyer. I graduated with a BSc in Applied Physics from the University of Groningen in 2026 and am now pursuing an MSc in Mechatronics, Robotics, and Biomechanical Engineering at the Technical University of Munich. My bachelor thesis project focused on implementing an array of pressure sensors into a bird-inspired airfoil to help with gust mitigation and phase-advanced flight control. I also have experience with coding in Python and C/C++ and vibrational analysis that I gained as a research assistant in the Distributed Autonomous Intelligent Systems (DAISY) lab. I am fluent in English, Polish, and Spanish and enjoy playing club football, bouldering, running and reading.

Relevant Experience

Bachelor Thesis & Research Student — Feb. 2026 – July 2026
Lentink Lab, University of Groningen — *Groningen, Netherlands*

- Thesis: *An Investigation into Gust Mitigation Strategies for Small Fixed-Wing Aerial Vehicles.*
- Designed and 3D-printed a bird-inspired airfoil with 11 embedded pressure sensors read by a Teensy 4.1.
- Ran wind-tunnel tests showing the sensor array detects lift and distinguishes turbulence types.

Research Assistant — Nov. 2024 – Jan. 2026
DAISY Lab — *Groningen, Netherlands*

- Created and analyzed vibrating models in DDS Abaqus using different Python scripting techniques.
- Designed experimental apparatus for testing robot maneuverability.

Mechatronics Engineer Intern — July 2025 – Aug. 2025 (8 week internship)
Aspect Biosystems, aspectbiosystems.com — *Vancouver, BC, Canada*

- Created SolidWorks CAD prototypes and engineering drawings with GD&T (Geometric Dimensioning & Tolerancing).
- SolidWorks PDM (Product Data Management) & R&D lab + clean room exposure.
- Recreated experiments seen in modern literature aimed to improve product quality.

Member of Engineering Team — Feb. 2023 – Nov. 2024
Cybanorth — *Groningen, Netherlands*

- Edited the Arduino IDE code that improved hand contraction and allowed for individual finger actuation.
- Tasked with R&D for the finger actuating mechanism.
- Soldered and wired electrical components for the mechanical hand prosthesis. Funded trip to ETH Zurich.

Research and Design Lab Assistant Intern — June 2024 – July 2024 (5 week internship)
Barberan, barberan.com — *Barcelona, Spain*

- Assisted with developing wave functions for a piezoelectric nozzle actuator.
- Took part in the manufacturing of industrial printers.
- Produced documentation with nozzle head analysis.

Education

Technical University of Munich — Munich, Germany
Master of Science in Mechatronics, Robotics, and Biomechanical Engineering — *Oct. 2026 – present*

University of Groningen — Groningen, Netherlands
Bachelor of Science in Applied Physics — *Sep. 2023 – June 2026*

British School of Barcelona — Castelldefels, Spain
IBDP + IGCSE — *Sep. 2019 – May 2023*

Technical Skills

Languages/Services: SolidWorks, Autodesk Inventor, Python, C/C++, Arduino IDE, LaTeX, PowerPoint, Word, Excel, Fusion 360.
Developer Tools: Google Colab, Visual Studio Code, Overleaf, Wolfram Mathematica.
Libraries: NumPy, Matplotlib.
